

# Seventh annual Tractor Drive raises thousands for juvenile diabetes research

By Siara Schwartzlow  
 EDITOR

Seventy-one tractors took to the streets in the seventh annual Tractor Drive benefitting juvenile diabetes research last Sunday, Sept. 11. Over 120 riders participated.

Ed Cook organizes the event every year with the help of his daughters, his son, and his wife. "I have two grandsons, and they both of type 1 diabetes," he said. "That's how [the rides] got started. We needed a fundraiser for juvenile diabetes. Why not try a tractor drive?"

Cook's youngest grandson, Cody, was diagnosed at 13 months old. He just turned 11. Cook's other grandson, Ethan, was diagnosed at 10. He's now 15. Next Sunday, Cody and Ethan will be participating in the Juvenile Diabetes Research Foundation One Walk in Madison. Proceeds from the tractor drive will benefit their team, Team Cody and Ethan.

Cook has been holding the annual tractor drive for the past seven years. The event took place in Evansville for the first three years, then moved to Orfordville. Orfordville has offered ample parking, food options, and space for the post-ride raffles, Cook says. They also coordinate with the sheriff's department. Two squad

cars helped to control traffic and allow the tractors to cross Highway 11.

The 31-mile drive took off from the American Legion in Orfordville, moved through Hanover, paused in Footville, and returned. "Everybody enjoys the route because you're going at 10 miles an hour instead of 50 miles an hour," Cook said. "You're just putting down the backroads. It's like riding a bicycle down backroads just casually versus driving your car."

Following the four-hour ride, participants were invited to lunch at the Orfordville Legion, available by way of free-will donation. Raffles and a silent auction took place during lunch. Some of the items raffled included Brewers tickets, a skydive, and antique furniture, along with toy tractors, perfumes, and a year's supply of ice cream, donated by Larsen Acres.

Cook has been gathering donations for the past six months. "Each year is a little different," he said. "Sometimes, you get a lot of big items, and the next year, you get a lot of small items."

Last year, the tractor drive event raised \$10,200. "We do a 50/50 raffle," Cook said. "A lot of times, whoever wins it - they just donate their half right back. Every dollar counts."

A string of tractors heads out to begin the ride.

Beyond money, though, Cook hopes to impact the community in other ways. "I hope that this brings awareness for the type 1 and what people can do for it," he said.

Cook would like to thank everyone who sponsored or donated. He would especially like to thank Sandy Hanke and Granger in Janesville, who together, donated \$2,000.

Anyone interested in participating in or donating toward the Juvenile Diabetes Research Foundation One Walk should visit [www.jdrf.org](http://www.jdrf.org).

Wagons were available for those wishing to ride along. Approximately 125 riders participated.

Over 70 tractors participated in last Sunday's tractor drive.

A number of John Deere tractors are lined up and ready to go before the ride.

The riders take a break at the halfway point in Footville.

### BELLY FAT MAY WEAKEN BONES

Scientists used to think that heavier people had denser bones, but new research suggests that having deep belly (visceral) fat may weaken bones. Researchers looked at CT scans of the abdomens and chests of about 7,200 men and women ages 18 to 65. People with more deep belly fat had worse bone density than those with less belly fat. This held true even if the participants had a "spare tire" around the middle but were in a normal weight range. The researchers also found that greater visceral fat was also associated with poorer-quality muscle.

# Local Scouts kick off annual popcorn sale

Cub Scouts and Boy Scouts from communities across south-central Wisconsin will be hitting the streets over the next several weeks to raise money through their annual popcorn sale. The sale runs from Friday, Sept. 16 through Tuesday, Nov. 1.

From each sale, 70% goes directly to support scouting in our area. Many Scouts use the funds to attend camp each summer. These funds also help ensure that the Scouts have a strong program, which will teach them important life skills and help them give back to the community.

In 2015, Scouts from the Glacier's Edge Council performed over 39,000 hours of service to the community and collected more than 103,000 pounds of food for local pantries and shelters.

The popcorn available in this fundraiser comes in 14 flavors and varieties, including chocolate-drizzled caramel with nuts, sweet and salty kettle corn, and the always-loved movie theatre with extra butter.

New this year are the Mauve popcorn varieties. Mauve popcorn tastes

great, contains antioxidants, and has virtually no hulls (which means less flossing following every bowl). There's nothing artificial in the Mauve Popcorn.

Customers can also make military donations to provide a special treat for our military personnel.

Scouts will be going door-to-door and setting up stationary stands in communities across the area. Those interested in purchasing popcorn who cannot find a Scout may visit [www.glaciersedge.org](http://www.glaciersedge.org) or call 608-310-7300 to place an order.

The Glacier's Edge Council of the Boy Scouts of America serves more than 7,400 youth with the help of 3,000 adult volunteers in multiple counties in south-central Wisconsin and northern Illinois.

# Parkview FFA alumni to host mum sale

The Parkview FFA alumni will be selling mums on Saturday, Sept. 17 from 8 a.m. to noon at the Farmers & Merchants Bank in Orfordville. Both small and large mums will be available. Proceeds from the mum sale will be used for scholarships and to help fund activities for Parkview FFA students.

A second sale will be held on Saturday, Sept. 24 from 8 a.m. to 1 p.m. at the Orfordville Farmers Market. The FFA alumni will also be selling cheese curds and hosting a brat sale at the market.

The Parkview FFA alumni group is a chapter of local residents wanting to promote the Parkview FFA. You do not need to be a Parkview graduate to be a member. Please consider joining.

# Orfordville Fall Fest to include scarecrow contest

# Green County Board Updates

By Erica Roth  
BOARD SUPERVISOR

In my last article, I told you about the hydrogeological study that the Land and Water Conservation Committee was pursuing. The end result of the study would be a hydrogeologic atlas of Green County, giving us a myriad of information about what is under our topsoil: maps of depth to bedrock, water table elevation, bedrock, groundwater contaminant susceptibility, and groundwater recharge. Some of this information is available currently, scattered across several different sources, but not compatible to mesh or overlay. Also, the current information is accurate only to about 1,670 feet. The study would bring this, plus additional information, together in a workable source with the benefit of increased accuracy to about 100 feet. That's a big difference!

The information from this study would benefit all of Green County. Knowing how susceptible to groundwater contamination a certain area is, which way an underground river flows, how deep bedrock formations are, and what type of rock they are is helpful when planning where to site a new well, a septic system, a gas station, a subdivision, a farm, or any number of things. This would be a definitive step in protecting our land and water in Green County, especially important as the size of farming is changing.

When I was campaigning last winter, I knocked on many doors and spoke to many people in District 24. We spoke about the study,

and with very few exceptions, I found that people are in favor of it. On Thursday, Sept. 9, the Land and Water Conservation Committee met to discuss the bids that had been submitted. The bids and the study were voted down in a 3-3 roll call vote.

Kristi Leonard (Dist. 25), Oscar Olson (Dist. 10), and Kenneth Hodgson (Dist. 14) voted FOR the study.

The NO votes were from Russ Torkelson (Dist. 21), Jeff Williams (Dist. 13), and Keith Hobson (not a county board supervisor).

At this point, the study will not be moving forward through the Land and Water Conservation Committee unless one of the people who voted no brings it back to the table.

In my last article, I told you about the proposed Government Services Building, which is still in the planning stages. This time of year is also budget time, as budgets are prepared for inclusion in the county budget.

The County Board will be meeting on Tuesday, Sept. 13 at 7 p.m. All meetings are open, and the public is welcomed. This includes the committee meetings.

As always, I encourage you to contact County Board Supervisors to discuss the issues with them. They are elected to represent you. Let your voice be heard.

I represent District 24, the Town of Albany. You can reach me at 608-371-9074 or EricaRothGreenCountyBoard@gmail.com.

Find out who your supervisor is at [www.co.green.wi.gov](http://www.co.green.wi.gov).

## West Nile Virus found in Rock County

The Rock County Public Health Department has reported that a dead crow found in Rock County on Aug. 23, has tested positive for West Nile Virus. This is the first bird that tested positive for West Nile Virus in Rock County since surveillance for the mosquito-transmitted virus began May 1.

"The positive bird means that residents of Rock County need to be more vigilant in their personal protective measures to prevent mosquito bites," Marie-Noel Sandoval, Health Officer, said.

West Nile Virus is spread to humans through the bite of an infected mosquito. Mosquitoes acquire the virus by feeding on infected birds.

"Rock County residents should be aware of West Nile Virus and take some simple steps to protect themselves against mosquito bites," Sandoval said. "The West Nile Virus seems to be here to stay, so the best way to avoid the disease is to reduce exposure to and eliminate breeding grounds for mosquitoes."

The Rock County Public Health Department recommends the following:

- Limit time spent outside at dawn and dusk, when mosquitoes are most active.
- Apply insect repellent to clothing, as well as exposed skin, since mosquitoes may bite through clothing.
- Make sure window and door screens are in good repair to prevent mosquito entry.
- Properly dispose of items that hold water, such as tin cans, plastic containers, ceramic pots, or discarded tires.
- Clean roof gutters and downspouts for proper drainage.
- Turn over wheelbarrows, wading pools, boats, and canoes when not in use.
- Change the water in birdbaths and pet dishes at least every three days.

- Clean and chlorinate swimming pools, outdoor saunas, and hot tubs; drain water from pool covers.

- Trim tall grass, weeds, and vines since mosquitoes use these areas to rest during hot daylight hours.

- Landscape to prevent water from pooling in low-lying areas.

The majority of people (80%) who are infected with West Nile Virus do not get sick. Those who do become ill usually experience mild symptoms such as fever, headache, muscle ache, rash, and fatigue. Less than 1% of people infected with the virus get seriously ill with symptoms that include high fever, muscle weakness, stiff neck, disorientation, mental confusion, tremors, paralysis, and coma. Older adults and those with compromised immune systems are at greater risk of developing central nervous system illness that can be fatal.

The Department of Health Services has monitored the spread of West Nile Virus since 2001 among wild birds, horses, mosquitoes, and people. During 2002, the state documented its first human infections, and 52 cases were reported that year. During 2015, nine cases of West Nile virus infection were reported among Wisconsin residents. West Nile Virus infections in humans have been reported from June through October; however, most reported becoming ill with West Nile Virus in August and September.

The Wisconsin Division of Public Health will continue surveillance for West Nile virus until the end of the mosquito season. To report a sick or dead crow, blue jay, or raven, please call the Dead Bird Reporting Hotline at 1-800-433-1610.

For more information on West Nile Virus, visit: <http://www.dhs.wisconsin.gov/communicable/ArboviralDiseases/WestNileVirus/Index.htm>.

# Local cover crop field days planned

Recently, low-flying planes have been delivering a different kind of relief for fields in the area. The planes are carrying seeds to be used as cover crops. These seeds are released over the growing corn or soybean crop, and the seeds float to the ground to begin their jobs. They will germinate and slowly begin to grow. Soon, the corn or soybeans, that once shaded the tiny seedlings, will be harvested, and the little seedlings will flourish. The field will turn green again like it did in spring. The recently planted seed's root will be feeding the soil

biology in exchange for nutrients. The green growth will be providing protection to the soil from rain and wind, and as the roots grow, they will be creating new paths for future roots to easily seek out nutrition. Aerially applying cover crops is one way to get the job done. Other farmers broadcast or drill their seed. Two Green County farms drilled plots into wheat stubble in early August in order to show what some varieties of cover crops look like and what they do for the soil. Three field days will be held this

fall. They are scheduled for tomorrow, Thursday, Sept. 15, Thursday, Oct. 13, and Tuesday, Nov. 9, to showcase numerous cover crops. Jim, Jeff, and Jamie McNeely's farm, also known as Rollin' Green Dairy, will be hosting the mornings of the field days from 10 a.m. until noon. Insight FS provided seed for their plot. They have six different strips planted. The types of covers they planted are crimson clover, radish, Austrian winter peas, winter triticale, cereal rye, and a mix of rye and radish. The farm is about three miles

south of Brooklyn off of Elmer Road, just west of Highway 104. The afternoon session will be from 1 p.m. until 3 p.m. at Dennis Miller's farm west of Brodhead, off of Highway 11-81. Heritage Seed Company provided the seed for his plot. The seed that he planted included rape-seed, berseem clover, forage turnip, purple top turnip, crimson clover, sunn hemp, barley, tillage radish, and several mixes. Farmers, agronomists, and interested landowners are invited to attend any one or all three field days.

The attendees to the field days will direct the discussion, but there will also be staff from the Green County Land and Water Conservation Department, Natural Resources Conservation Service, and UW-Extension to contribute and answer questions about why to use cover crops, advantages and disadvantages to certain plants, and herbicide effects on cover crops. For more information, contact Tonya Gratz with the Green County Land and Water Conservation Department at 608-325-4195, ext. 121.
